The L3Harris CRATOS is a miniaturized all-in-one thermal weapon sight designed for handheld, clip-on or stand-alone use. The thermal imaging capability of the CRATOS allows for observation and target identification under adverse conditions including light rain, smoke, light snow, and low-light to total darkness. Its integral laser pointer allows for handoff of target positions to the warfighter with night vision goggles.
• Low-power laser only mode
• Capture, store and download up to 150 images
• Color thermal display
• Passive ranging
• Reticle boresighting
• Additional ballistic reticles
